

Sustainable yarn for a cleaner world

RECYCLING FOR THE FUTURE

In order to sustain the environment for future generations, recycling is of great importance. The never-ending exploitation of natural resources is a harmful and dangerous approach to environmental preservation.

Choosing products made from, or with, recycled materials can really make a difference.

YARN MADE OUT OF RECYCLED WATER BOTTLES

Second Life is a superior collection of mattress ticking, using Miroglio Group's top quality New Life yarns that are made with recycled plastic water bottles.

Second Life reduces carbon emission, energy consumption and the use of virtual water.

Fight for a cleaner world with Second Life!
