

# Your natural mattress ticking

## BAMBOO

Bamboo is a very special plant, not only because it is the strongest and fastest growing plant on earth but also because of its exceptional natural antibacterial qualities.

It develops a natural barrier against bacteria.

## THE BENEFITS

Deslee Mattex introduces mattress textiles made out of bamboo yarns that benefit from the natural and permanent hygienic properties of the bamboo plant.

This hygienic, natural solution replaces chemicals and is friendly to the environment. Bamboo offers a higher moisture absorption than cotton, is amazingly strong, and the yarns weave or knit a very breathable textile.

## PURE NATURE IN BED

Bamboo fibre is used for its natural antibacterial properties, which make it ideal for people suffering from allergy.

The remarkable absorbing capacity and excellent permeability, together with its softness and extreme strength, guarantee exceptional sleep comfort.

Bamboo has a soft hand,  
a cool touch and  
a natural, silky lustre.
