

Inspired by Nature, EcoLuxury

Very few fibres can boast the unique combination of luxury and comfort, of refined class and user-friendliness.

NATURAL COOL FABRIC

In this fabric we utilise both linen and bamboo yarn. The linen yarn provides the soft and luxurious feel, whilst the bamboo yarn provides a cooling and anti-bacterial effect.

Combining these two yarns give a natural feeling and looking product whilst still offering value add cooling and anti-bacterial properties.

WHAT A FEELING!

Sleeping on Natural Cool fabric imparts a wonderful feeling of well-being. It is very relaxing because it can lower body temperature and relax the muscles. Being too warm in bed is generally recognised as a major factor in poor quality of sleep.
