

Purotex[®] uses a revolutionary technology based on 100% natural probiotics

Fabrics treated with Purotex[®] contain micro-capsules that are filled with natural probiotics. These probiotics are a 100% natural remedy against allergenic sleep disrupters. Thanks to friction between your body and the

fabric, the microcapsules burst open and absorb humidity. The probiotics start to multiply and clean up allergens. You will also find probiotics in yogurt to guarantee a healthy microflora.

Discover Purotex[®], nature's own technology for a clean, fresh and healthy sleep environment.

RAISE AWARENESS, GET A GOOD NIGHT'S SLEEP!

Did you know that about 1/3 of the population suffers from House Dust Mite Allergy (HDMA)? This type of allergy is caused by the inhalation of house dust mite allergens, small skin particles that have been in contact with DERP1, the enzyme that the mites use to digest food. There are millions of these allergens in every bed.

Purotex[®] reduces allergens drastically and keeps your mattress surface clean and fresh in a natural way.

By applying active probiotics on mattress or pillow textiles, Purotex[®] permanently cleans up allergens. A fresh and clean sleeping environment is guaranteed. Moreover, test results have shown that Purotex[®] also cleans up cat and dog allergens.
