

It provides the
safest, cleanest and
healthiest sleeping
environment
possible

Vital is a proven, extremely effective, highly durable and long lasting fabric impregnation treatment that can:

1. Effectively repel and kill bed bugs
2. Protect a person from bed bug bites while asleep
3. Also provide an anti-bacterial and dust mite free night's sleep

The key ingredients utilised are naturally derived and effectively work on the nervous system of the bed bugs and dust mites that may inhabit bedrooms.

THE BENEFITS

Vital protects guests from bed bugs while they sleep

- It repels and kills bed bugs and stops infestations
- Independent testing has demonstrated effective protection from bed bug bites whilst asleep
- It helps the hospitality industry to prevent bed bug complaints, bad publicity and compensation claims
- It is also 'anti-bacterial' and kills dust mites, offering unprecedented hygienic advantages to guests with allergies'
- It gives the guest essential health protection and peace of mind
- Vital's organic chemistry has been independently tested and is safe to both the environment and to the hotel guest
- Vital can be applied to the fabric covering a mattress, a topper, a divan base or an upholstered headboard
- It is invisible and odourless with no negative impact on fabric feel or look
- It will NOT affect the FR integrity of the fabric
- It is not affected by sunlight and UV rays, nor can it be washed off
- It also stops fabric degradation, preventing bacteria and mould from attacking the fabric
